

Name: Khoa Nguyen - 43498533

Group Number: 4

Individual Contribution

- Write project proposal, find research materials, and manage project.
- Implement and maintain `single_digit_trainer.py` and `project.ipynb`.
- Modify and enhance `Data_harvest.py` that is written by other member in the group to download data correctly.
- Run `single_digit_trainer.py` to compute the first model that classifies single digit from images called 'classifier.ckpt'.
- Created cropped images from raw test data so that the model can predict with better result.
- Write project report sections: Technical Approach, Software and Tools used, and Result.
